ABOUT LINKEDIN LEARNING

LinkedIn Learning is a vast online library of high quality video-based courses covering anything from photography to programming and from getting through interviews to core business skills. All the videos are written and presented by industry and subject experts.

KEY BENEFITS

As a student or staff member at the University of Plymouth you have free, unlimited access to the whole LinkedIn Learning library, including tutorial exercises and practice environments.

- Covers a vast range of topics.
- Supplement face-to-face learning with LinkedIn Learning tutorials or collections.
- Totally free, whilst at University.
- Access from a range of devices, even while on the move via the LinkedIn Learning app.
- Attain certificates of completion.

LOGIN TO LINKEDIN LEARNING

Using the web address below, you will gain direct access to LinkedIn Learning.

You can start using the service by using your University sign in credentials.

MAIN FEATURES

Bookmark videos
Mark any video within a course so you can easily find them later.

Curate and share collections
Add individual videos or whole courses to collections to share.

Add notes
Make and save your notes in LinkedIn Learning alongside videos.

Knowledge check
Most courses and learning paths have quizzes built-in to test learning.

Embed in other places
Videos can be embedded in other place such as Moodle courses.

BLENDED LEARNING

LinkedIn Learning supports a Blended Learning approach. By Flipping the Classroom, you can provide opportunities for active learning in face-to-face sessions. Instead of providing new learning materials in-class, assign LinkedIn Learning courses or collections as pre-session work.

Students can then practice and apply their new knowledge or skills in the classroom through various activities or exercises.

SHARE COLLECTIONS

Collections allow you to curate and share LinkedIn Learning content with your students. With collections, you can create a custom group of training videos bespoke to your teaching needs.

Whether you are teaching a particular tool or skill, collections can be a great way to group suitable and related content which is designed to supplement your face-to-face teaching.

OVER **8,000** COURSES   OVER **200,000** VIDEOS

CONFIDENT PROFESSIONALS

Upon completing LinkedIn Learning courses, students are issued digital certificates of completion. These certificates can be included as evidence in their portfolios or their LinkedIn profiles.

LinkedIn is tightly integrated into networking, searching for jobs and business development, making it important to evidence specific skills or knowledge when seeking employment.

Architecture have built LinkedIn Learning into their curriculum so students can learn 3D modelling software.

LinkedIn Learning has allowed limited face-to-face time with students to focus on the theory of architecture and learning the software now occurs outside of teaching hours.

A CULTURE OF LEARNING

Being successful in today's workforce means being a lifelong learner. Technology is always changing. The tools we use to conduct business, to communicate, and even to stay organised, are rapidly developing.

LinkedIn Learning continually update existing courses as well as releasing new ones, so the materials you share are always relevant to today's learners.
